# Click Open.

The screenshot shows a Microsoft Internet Explorer browser window displaying the Kyocera website. The page title is "Resource Details - Microsoft Internet Explorer provided by RGO Information Systems". The address bar shows the URL: [http://ca.kyoceramita.com/KMCAGlobalpub/jsp/Kyocera/resource\\_details.jsp?rid=13453](http://ca.kyoceramita.com/KMCAGlobalpub/jsp/Kyocera/resource_details.jsp?rid=13453). The website header includes the Kyocera logo, "KYOCERA MITA", "Canada", and a language dropdown set to "English". Navigation links include Home, News, Downloads, Worldwide Site, Search This Site, and Print. A left sidebar contains links for About Kyocera Mita, Products, Awards and Recognition, Solutions, Service and Support, Where To Buy, Contact Us, TCO Tracker, and Customer Testimonials. The main content area is titled "RESOURCE DETAILS" and features the product name "Kyocera Network Fax Driver ver. 2.0.0406 for Win2K & XP". Below the product name, it states "Kyocera Network Fax Driver ver. 2.0.0406 for Win2K & XP. It allows multiple fax drivers on one workstation with different IP addresses." The release date is "4/26/04" and the current legacy is "Current". A "Back to Listing" button is visible. A "Download complete" dialog box is overlaid on the page, showing the file "NW-FAX\_Win2K\_XP.exe" has been saved from ca.kyoceramita.com. The dialog displays a progress bar and download statistics: "Downloaded: 3.53 MB in 18 sec", "Download to: C:\kyocera\N\FAX\Win2K\_XP.exe", and "Transfer rate: 201 KB/Sec". There is an unchecked checkbox for "Close this dialog box when download completes". A red arrow points to the "Open" button. On the right side of the page, there is a box with "VERSION: 2.0.0406", "OS: 2K, XP", and "DOWNLOAD: NW-FAX\_Win2K\_XP.exe". Below this is a "RELATED RESOURCES" section with links to "Print Utilities | Kyocera Address Book for Network Fax ver. 1.2.2" and "Print Utilities | Kyocera Address Editor for Network Fax ver. 1.00". A "RELATED PRODUCTS" section lists various models like KM-1650, KM-2050, etc., with their specifications.

# Click Setup.

This screenshot is similar to the one above, showing the same Kyocera website page. However, the "Download complete" dialog box is no longer present. Instead, a "WinZip Self-Extractor - NW-FAX\_Win2K\_XP.exe" dialog box is displayed. The dialog contains the text "This will install the Network Fax MFPs." and has three buttons: "Setup", "Cancel", and "About". A red arrow points to the "Setup" button. The rest of the website page, including the navigation, sidebar, and product details, remains the same as in the previous screenshot.

## Click Next.

Select a new name if desired and select **No** for default. Click **Next**.

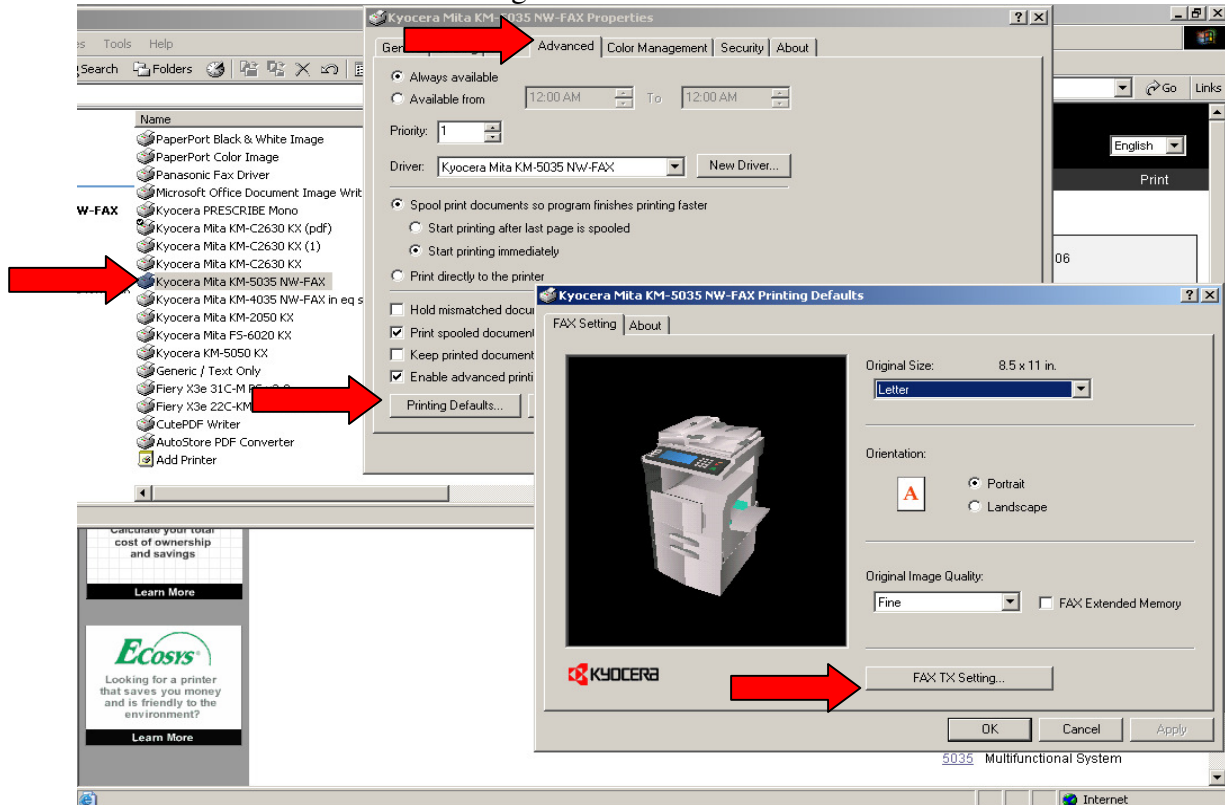

Click **Install**.

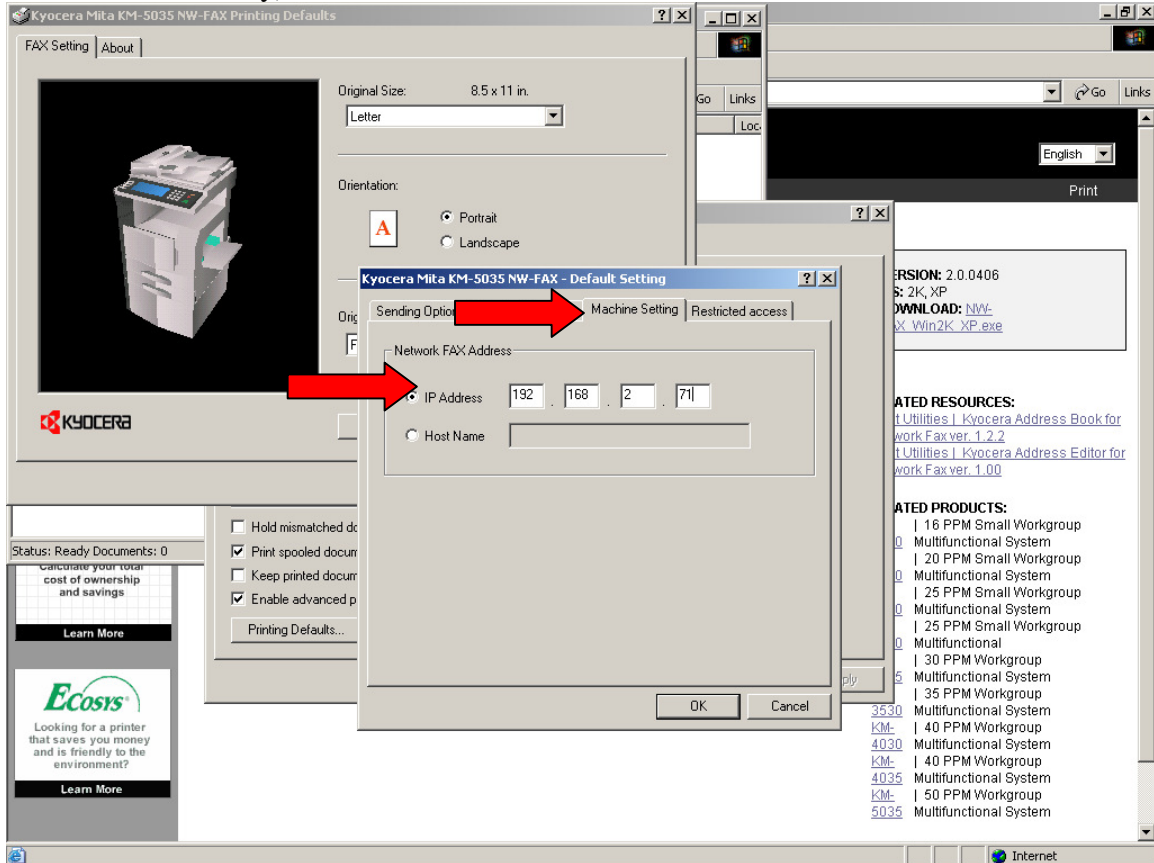

## Click No and Finish.

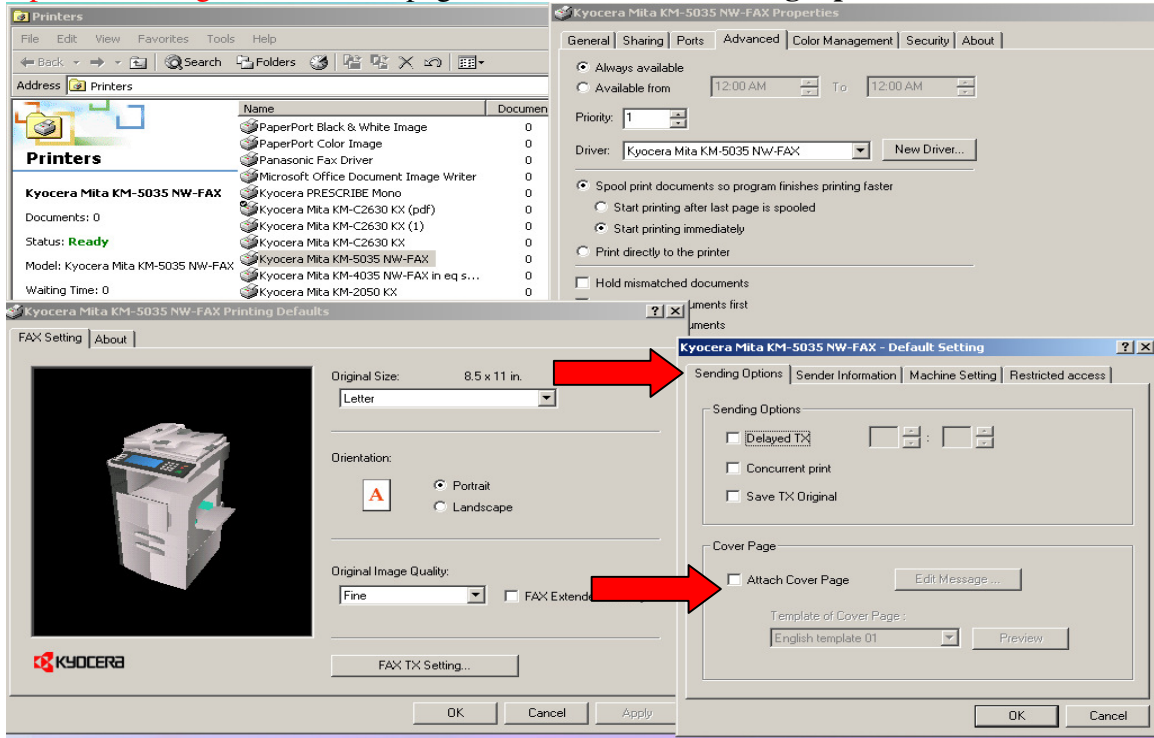

The driver is installed, but needs to be configured. **Open your printers' folder**  
**Right click** the printer and the **properties**, click the **advanced** tab and the **Printing defaults**. Click the **Fax TX** setting.

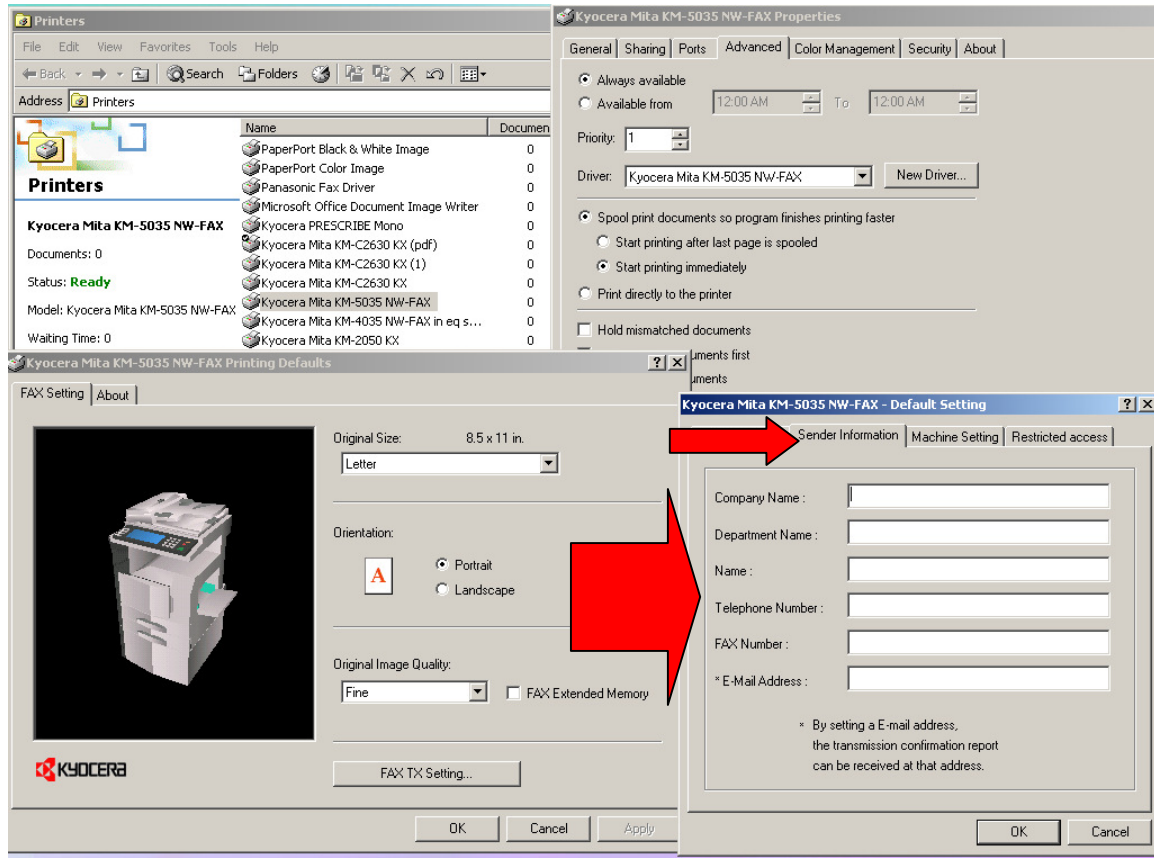

Click the machine setting tab and enter the **IP address of the Scanner card**. (Printer for KM 1815/1820 only).

**Optional settings:** Select cover page if desired on the **Sending Options** tab.

Enter any other desired end user information on the **Sender information** tab.

Click **OK** to close all windows to complete the installation.

**Congratulations, the installation is successful.**

To test, open a test document, print to the fax driver printer that was created. A window will open for the fax number to be entered.

Click **add to destination list** and click **send**. The document will be transmitted via fax.

An additional address book utility can be loaded to save frequent user numbers from [http://ca.kyoceramita.com/KMCAGlobalpub/jsp/Kyocera/resource\\_details.jsp?rid=14109](http://ca.kyoceramita.com/KMCAGlobalpub/jsp/Kyocera/resource_details.jsp?rid=14109)

**Special note** for specific computers and windows XP SP2: If the net fax driver works but an error is displayed, you may need to change the port for the driver from LPT1 to standard TCP/IP of the printer card IP address.
