

DOUBLE-BARREL PROTECTION!

PRO-TIP® Ultra Disposable Air Water Syringe Tips. Their double-barrel design keeps water and air right where you want them.

With PRO-TIP®, there's no blow-by mess, like you get with metal tips. Its double-barrel design keeps water and air totally separate... guaranteed. So you'll get water when you need water, air when you need air.

PRO-TIP Ultra's special twist-and-lock design won't eject, yet it's incredibly easy to change tips from patient to patient. PRO-TIP Ultra is built so sturdy, it's perfect for cheek retraction.

And since it's disposable, PRO-TIP Ultra safeguards your patients and practice against cross contamination, quickly and easily. When you're done, simply toss the old tip away, and put on a new one—locked and ready to go. Germs don't have a chance.

PRO-TIP Ultra Disposable Air Water Syringe Tips. The protection you want... and clean shots... every time.

Try PRO-TIP® Ultra Today. Request a **FREE Converter Kit for your syringe.** Contact your dental supply dealer or visit www.sultanhealthcare.com
